PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with six months of hands-on full-stack development internship experience. Skilled in Java, JavaScript, React.js, Node.js, HTML5, CSS3, SQL, MySQL and MongoDB, with exposure to REST APIs, application testing, databases and debugging fundamentals. Strong in problem solving, requirement understanding and building responsive, user-friendly applications. Seeking Full-Stack Developer, Java Developer or Software Developer opportunities.

TECHNICAL SKILLS

Programming: Java, JavaScript, Python (Foundational), SQL

Frontend: HTML5, CSS3, React.js

Backend & APIs: Node.js, REST APIs, Web Application Development

Databases: MySQL, MongoDB

Tools & Engineering: Git, GitHub, VS Code, Application Testing, Debugging Fundamentals, Problem Solving

INTERNSHIP EXPERIENCE

Full Stack Development Intern | Cuvette Tech Pvt. Ltd.

Dec 2023 - May 2024

- Worked on full-stack development assignments involving application development, testing, databases and APIs.
- Supported development and testing activities across application components while collaborating with team members on assigned technical tasks.
- Worked with application data, database operations and API-related functionality while validating expected application behavior.
- Identified functional and logical issues during testing and used structured problem solving to support resolution.
- Applied programming fundamentals and requirement understanding while gaining practical exposure to software development workflows.

TECHNICAL PROJECTS

Personal Portfolio | HTML5, CSS3, JavaScript

GitHub

- Built a responsive developer portfolio with modern navigation, featured projects, skills, theme controls and professional contact links.
- Implemented mobile responsiveness, active-section navigation, typewriter text, reveal animations and interactive UI behavior with JavaScript.

Apna Hostel Management System | Java, MySQL

- Developed a database-backed hostel management application with application logic, data handling, database operations and functional testing.

Tourism Management System | Java, MySQL

- Built a Java application for managing tourism-related information using MySQL database connectivity, data operations and functional testing.

Rock Paper Scissors | JavaScript, HTML5, CSS3

- Created an interactive browser-based game using JavaScript for user interaction, conditional logic and game functionality.

EDUCATION

B.E. - Computer Science & Engineering | Sengunthar Engineering College, Anna University

2020 - 2024

CGPA: 8.3/10

CERTIFICATIONS

Python 101 for Data Science - IBM | Web Technologies - Extol Tech | PC Hardware & Troubleshooting - Extol Tech

CORE STRENGTHS & LANGUAGES

Problem Solving | Analytical Thinking | Communication | Team Collaboration | Adaptability | Languages: English | Hindi | Tamil (Beginner)
